

ARBOR DEMO BOARDS

WESTMARK

Another collaboration with our AWOL friends at Rogue Status - this advanced mid-wide design was developed for deep, multi-dimensional park and street performance. A bamboo-reinforced core provides massive pop and durability, while a progressive directional-twin shape and dialed flex give it a buttery feel for spin, slide, and press initiation and control.

Park & Pipe Directional Twin Size: 155

ROUNDHOUSE

Ride all your favorite terrain with the Arbor Roundhouse Wide Snowboard. Pipe, groomers, powder—you like it all. The only problem is that your size 12 boots always drag when you turn toeside. This wide deck gives you skinny-board performance and doesn't lag behind. The Roundhouse's bamboo topsheet and wood core give you easy turn initiation and superior edge control at any speed. A carbon fiber strut provides a catch-free ride and just the right amount of pop so you can make that extra rotation. Meanwhile, the progressive sidecut and super-fast sintered base give you the high-speed control to cruise past the masses on their skinny planks.

Big Mountain Directional Size: 163

A-FRAME

The Arbor A-Frame snowboard, like the cabin you've been dreaming about, lets you access terrain that consistently blows your mind. This big-mountain snowboard gives you a super stable ride, whether you charge through powder or lay deep carves on the hardpack. A progressive sidecut and carbon fiber inlays running between the inserts and contact points give you torsional flex that holds an edge like no other. This snowboard's powerhouse tail not only floats through the deeps, but gives you a solid landing pad, allowing you to stomp the biggest airs with ease. Arbor honors snowboarding's surf roots with an inlaid maple, walnut, and palisander topsheet. The solidly made A-Frame will be in your quiver for many seasons to come.

PUSH

Designed for women who surf mountains, with a structural bamboo top, directional shape, and lively flex that deliver energetic initiation, reliable control, and the ability to express a clean line in all conditions. Ideal for powder, natural hits, trees, steeps, groomers, and more - provides all the freedom you'll need to reach the limits of your big-mountain chi.

CADENCE

A versatile, all-mountain board for women who take a park-inspired set of skills to the whole mountain. A structural white erable wood-top and inlaid red poplar birds, progressive directional-twin shape, lightweight core, and softer flex support spin tricks, rail sessions, and slope-style cruising. Look for a super fun disposition, light-touch initiation, and lively return.
